## AKP Installation Instructions

Android Devices

# ACCURACY

### Download APK File from:

#### accufiretech.com/support

Accufire-4.0.apk. 1.1.1

> 渣 Network

# Transfer APK file to your Android Device in an area easy to find

On your Android Device, download a file explorer. We tested CX File Explorer in the Android Store

Search Phone Settings for "Install Unknown Apps" and allow CX File Explorer to Install Unknown Apps

Open CX File Explorer, find the folder with the APK Download, select the APK file, tap "More", and tap "Open with"

After tapping "Open with" select "Other"

Find the option listed as "Package installer", select it, then confirm with "JUST ONCE"

#### Internet may not be available

If you want to connect to this network without internet access, you can connect only this time or you can set your phone to always connect to it even if internet isn't available.

You can change this in Settings > Connections > Wi-Fi > ADVANCED > Switch to mobile data > Network exceptions.

111

#### Connect only this time

Ο

Return to the Accufire App and select "Connected Device" to connect your device to your scope and you'll be back in action
